

■ Advanced Olist SQL/Data Analysis Questions

■ Customer & Orders Analysis

1. Which customers placed the most orders overall?
2. Find repeat customers (placed more than 1 order).
3. What is the average time between a customer's first and second order?
4. Identify customers who placed an order but never received it (cancelled or not delivered).
5. Compute customer lifetime value (CLV) (total money spent per customer).

■ Product & Category Analysis

6. Which product categories have the highest revenue vs highest number of orders? (compare popularity vs profitability)
7. Find the most refunded or canceled product categories.
8. Which products have the highest return rate (delivered vs returned)?
9. Find the average delivery time for each product category.
10. Which categories have high freight cost as a % of order price?

■ Seller & Marketplace Analysis

11. Which sellers generate the highest revenue?
12. Find sellers with longest average delivery delays.
13. Rank sellers by customer satisfaction (using review_score).
14. Which sellers have most cancellations or refunds?
15. Find sellers who sell in multiple categories vs sellers in single category.

■ Logistics & Delivery

16. Compute the average delivery delay = delivered_date – estimated_delivery_date.
17. Find the % of orders delivered late each month.
18. Which states/cities have the longest average delivery times?
19. Compare freight cost vs delivery distance.
20. Identify months where logistics performance improved or worsened.

■ Payments & Revenue

21. Which payment type contributes the most to revenue?
22. Find the average number of installments per payment method.
23. Which orders had partial payments (multiple payment records for same order)?
24. Calculate the % of total revenue paid using Credit Card, Boleto, Debit Card, Voucher.
25. Find customers who used different payment methods across orders.

■ Advanced Metrics (Window Functions & CTEs)

26. For each month, calculate the running total revenue (cumulative sum).
27. For each customer, find the rank of their orders by purchase date.
28. Calculate monthly cohort retention (e.g., customers acquired in Jan — how many ordered again in Feb, Mar...).

29. Find the top 3 products in each category by revenue.
30. Identify seasonality trends: which months consistently have higher sales?
